## CONGRESSIONAL NOTES

Washington Interviewed.

Washington Dec. 1—Represe stative Morrison, chairman of the ways and reans committee, was asked to-hight by an asvociated press reporter if he thought there was a probability of the enactment of any tariff legianton the present session. He replied that he had not yet had an opportunity to ascertain how the indept he there had been some modification of opinion by representatives since the last session. It was retain that if there had not been some change it the views by democratic members no tax reducts on could be had, except by aid of republicans. He added "I do not propose to attempt any experiments, but if, upon h quiry, I find there is reason to think a bill proposing a moderate reduction could plass this session, I shall certainly bring in such a bill." In answer to turther questioning, Morrison and it was not unlikely that the discussion of legislation nece vary to carry the Mestinant treaty into effect would open ut the general tariff question. The new treaty with Spain in relation to the commerce of the United States with Cuba and Porto Bico, would be discussed in executive session by the senate, and would not Ricky fload to any open discussion of the taruff questions. As to other work of the session, Morrison, and it is would take up most of the time of the session.

The Head of a Department Tells How the New Deal Will Operate -- Misca laneous Matters

From a Washington Corr, point of Washington, Not. 23.—Acciden promises to give us greater constitutional reform than years of congress have done. Dr Burcha dis futeful alliteration, throwing one party out of power, and exalting another into what may be twenty years of dominance, has started more thought on the civil service than the devitinalines could have submitated in their lifetings. I have gone about the hotels and departments this wook hearing what was to be said about the incoming administration. You have no idea what singular and diverse effects an exchange of parties has on people here. Curtisity is min fold in all sorts of personal and political traits if the next president. Soriety is pealous of new rules and wants to know what sort of a figure be will cut in the state circles. Much depends in this respect on that peculiar dignity in this country, espect on that peculiar dignity in this country, the lady of the White House he see the put tern which all must follow, and to her, from cabinet members' wives down, all how it would be a very certain relief to many good people of the world to know whether Mrs Bojd, the new presidents sister, or pretty Mrs F t know whefler Mrs Bold, the new predict Mrs F I some for whose father he once up on a fine performed a vicarious kindness, is to preside over Washington soci-ty next session (covernor Cleveland goes to a Predicter an don the Milian), and that fact causes a fitter of curiously said expectation among several very respectable houses of worship here. fish having died during the trip."
"Have you more than one kind of fish?"
"Not now. We had when we started carp, tench, goldenites, but all these except that variety known as the leather carp were all distributed in Illinois, lowa, Wisconein and Minnesota. The tenchis an antirely new food fish so by as this country is concerned, but is well known in termany. It is prolific and hardy, though it does not atland so rapid ner so great agrowth as the German carp. It is a scale fish and of good fiaror. The goldenite, while it is a known in Germany. It is prolific and hardy, though it does not alkalo so rapid nor so great a growth as the German carp. It is a scale fish and of good flavor. The goldente, while it is a wholescope food fish, is not so desirable, because of its bony character, but as it is of a very bandsome golden hue, it is looked upon as a pretty fancy fish for pond, etc. It also comes from Germany."

"How will the fish you now have be distributed in this section?"

"Through the express companies to various parties in Gregon and Washington territory who have made application to the commission at Washington thring the past year."

"What are the terms upon which the commission makes its distribution."

"Free of charge, except/or the cost of the pall—twenty-five cents—six) the expressare from Portland."

"We only give out from sixteen to twenty fish this year, owing to the large number of applicants and the desire to disappoint in one. When we were leave a year against and the desire to disappoint move had so many fish had such a thing as running short was not antiquisted. But we did and complaints were made to the commission that we gave fish away to deloon keepers and curious people who wanted a very to just in aquariums, and therefore had nonly give to people who really desired to propagable the species and had ponds satishie for that purpose. I have no doubt that we were imposed upon but how could we do otherwise Men came to us and made affined with link they had points and wanted the carp for the purpose intended by the commission, and such being our instructions, we had no recourse but to hand out the fish. The applications having been made to Washington this time, we shall not be subject to such imposition and consequent unconners, at least, not until all those who are justly entitled to the fish have received them."
